

Echokind

be the reason hope echoes today

presented by: Y3S1-WE-02

Purpose of Echokind

The Echokind mobile application was developed to address SDG Goal 1 – No Poverty by connecting donors with underprivileged individuals in local communities. and our project aimed to create a centralized digital platform that streamlines charitable giving, increases transparency, and fosters community engagement,

Our approach : User-Centric Design Thinking

User Research & Insights

- Conducted extensive research with donors, beneficiaries, volunteers, and administrators.
- Methods: online surveys & semi-structured interviews.

Key findings

Finding 01

Need for verified requests

Users expect authentic and trustworthy requests

Finding 02

Clear communication between users

Users want easy and transparent interaction

Finding 03

Simple, intuitive workflows

Users prefer tasks that are easy to follow.

Finding 04

Transparent progress updates

Users want to know how their contribution is making an impact.

Key identified features as solutions to the user requirements

01

Beneficiary Hub

Submit verified help requests with supporting documents.

02

Donor Hub

Browse verified requests, make secure donations, and view impact dashboards.

03

Community Platform

Engage with posts, comments, and events for volunteering.

04

Learning Center

Register for workshops promoting skill development.

User Testing

- Tested high-fidelity prototypes in Figma with real users.
- Focus areas: navigation, task clarity, and accessibility.
- Feedback led to
 - Better screen layouts
 - Simpler forms
 - Clearer progress tracking

Technology Stack and novel features

Echokind leverages modern, secure and maintainable technologies to ensure long term sustainability and reliability

React Native with Expo

Enables cross-platform development for Android & iOS with a consistent user experience

Appwrite (Backend Service)

Provides authentication, database, and cloud functions for a secure and scalable backend

To Enhance the personalized user experience for local communities by providing tailored recommendations, secure local payments, and accessible language support our mobile app connects with these novel features

Gemini API

Stripe Payment Gateway

Translator API

Together, we can end poverty-one act of kindness at a time.

Measuring Impact: Initial Projections

Based on prototype testing, user feedback, and community engagement analysis, Echokind is positioned to deliver significant social impact within its first year of operation

5K

Verified Requests Fulfilled

Echokind is positioned to deliver significant social impact within its first year of operation

2.5K

Active Donors & Volunteers

Number of donors and volunteers actively engaging with local communities.

90%

User Satisfaction Rate

Projected rate of satisfaction among donors, beneficiaries, and volunteers based on ease of use, transparency, and personalization.

Future enhancements and global scalability

To maximize impact and foster worldwide community engagement, our roadmap focuses on expanding Echokind to connect donors and volunteers across borders, while enhancing intelligence, inclusivity, and personalized support.

Global Donor Network

Scaling the platform to include international donors, enabling seamless contributions and real-time tracking for global communities.

Advanced AI/ML Matching

Using predictive algorithms to match donors with beneficiaries efficiently, ensuring resources reach the people who need them most.

THANK YOU!
